## **HOYA Corporation Announces Joining RE100 International Environmental Initiative Aiming to Achieve 100% Renewable Electricity**

HOYA Corporation (hereafter, "HOYA") announces that it has joined the RE100 international environmental initiative that encourages companies to procure 100% of the electricity they consume in business activities from renewable sources.

Led by "Climate Group", an international environmental NGO, and in partnership with "CDP", RE100 is a global initiative bringing together the world's most influential businesses committed 100% renewable electricity.

HOYA has committed to sourcing 100% renewable electricity across its global operations by 2040, with an interim target of 60% by 2030. In addition to updating to high-efficiency equipment and energy-saving activities at our production sites, we have started installing solar panels and switching to electricity derived from renewable energy globally.

HOYA has positioned "achieving a decarbonization society" as one of the key issues, and through our membership in RE100, we will accelerate our efforts to utilize renewable electricity.
